

Review Title: “A Revolutionary View of Biblical History!”

Rating: *** 5 stars**

**Book Review by Joseph Teodosio, Reviewing
The Language of God In History by Helena Lehman**

This was the most fascinating book I have ever read! Helena Lehman has filled in the gaps of many of the records in the Bible with her exhaustive research of how the Earth was before and after the flood! She paints a vivid picture of how the Earth and its inhabitants really were before and after the Great Flood, so much so that the Bible came alive to me in a way it has not for years! The Star Gospel, the pre- and post-flood world, the Nephilim and their affect on mankind then and now, the symbols used throughout history, who built the Pyramids and what their purpose is, and so much more are intricately and carefully explained.

Helena’s love and awe for the God of the Universe is conveyed in every page. Her desire for the reader to understand the wonders of the Creation, as well as God's intent for Mankind vs. the enemy's plan for its destruction and ruin is intriguing! One cannot help but be in total awe of the inexhaustible unyielding love that Yahshua has for His creation and the total contempt and hatred of the Devil toward anything God has done.

This book has opened my eyes to the enormity of what Jesus did for mankind. It is a book that will make you stand in total amazement at the complexity of this world past, present and future, and will give you a better understanding of what was, is and is to come!

Even if you have a pretty good working knowledge of the Bible, this book will answer countless questions you may have had concerning the Nephilim, Abraham, Moses, and many more of the great Patriarchs of the Bible. I liken this book to a movie I once saw. If you did not stay for the credits, you would not really know what happened in the movie! You may know the Bible, but with the help of the Books of Enoch, Jasher and Jubilees so many insights will be given that will thrill you and increase your love for Yahshua. It is truly a book for those who desire to know what REALLY happened in history and its link to today's world.
