copied in 1773 from a manuscript that could not have been older than the Renaissance era due to the deterioration of manuscripts and the need to recopy and replace them every 100 to 150 years or so. In my opinion, the absence of these chapters in the Dead Sea Scrolls seems extremely significant since there was only a very small group of scholars and scientists who have been allowed to examine, preserve and translate the scroll fragments, and initially not one of them was a Christian.

In other words, it is possible - even probable - that the existence of Qumran fragments of these chapters in 1 Enoch may have been covered up and destroyed by those who want no evidence that would support Christianity’s claims about Yahshua. Of course, it takes many years of painstaking labor to piece together and translate each scroll, and - as a result - not all of the Qumran texts have apparently been translated as of 2008. As a result, fragments of the missing chapters of 1 Enoch could yet turn up in the next few years as new translations of the texts emerge - though I wouldn’t count on it at this late hour! Eschatologically-speaking, we are already in the Last Day, and the seven-year Tribulation that must occur before Christ’s Second Coming is imminent. This means that the Antichrist of antichrists is probably alive and well at this time, and it is likely that he already has some political, economic and military power to utilize toward achieving his destructive and diabolical aims.

**Enoch: the First Magi to Fully Decipher the Heavenly Tablets**

Unfortunately, many wonderful records of Yahweh’s greatness were almost completely lost due to satanic corruption and destruction before and after the Flood. One of these magnificent records is found in the night sky - in the constellations of the Zodiac. There is ample evidence in the Book of 1 Enoch that the Language of God found in the Mazzaroth or Zodiac was known and understood prior to the Great Flood. Let’s examine this book for clues as to the extent of this knowledge.

As mentioned earlier, 1 Enoch contains a section called “The Book of the Heavenly Luminaries.” This section of Enoch’s book contains a great deal of astronomical observations and facts, and discusses the way he was shown how to track both the movements of the Sun and Moon using an outdoor construction known as a henge. We will discuss various aspects of this celestial section of 1 Enoch in the remainder of this chapter.
In his writings, Enoch mentions a special record that he had access to, and that he called "the heavenly tablets." Furthermore, Enoch mentioned a testimony that Yahweh God had placed in Heaven. Could this heavenly testimony and the Heavenly Tablets be the same thing? As explained in Book One, it is fairly certain that Enoch called the band of symbolic stars that we call the Zodiac, as well as the thirty-six decan signs associated with them the Heavenly Tablets. In addition, the Dendera Zodiac may represent the 360 other books Enoch purportedly wrote before being taken up to Heaven. If so, this carved Zodiac would be a pictorial record of everything that Enoch saw in God’s Heavenly Tablets, and would be much older than the Greco-Roman era temple it was found in that is dated to around 400 BC.

Could Enoch have carved the Dendera Zodiac prior to the Great Flood? Later, could it have been re-appropriated by the ancient Egyptians and placed in the Chapel to Osiris that was built on the roof of the Temple to Hathor at Dendera? Though it is an intriguing possibility, there really is no way of proving this for certain. But there are clues, for this carving appears to show advanced weathering and more messianic symbols for the constellations than the Egyptians used for the same star signs in the Temple to Hathor below the Chapel.

Another clue often overlooked by archeologists is the fact that the Dendera Zodiac features a more difficult raised style of relief carving than the inferior incised type of reliefs used on the walls of the New Kingdom era temple it was found above. This raised style of relief carving is associated with the Old Kingdom (i.e. Pre-Flood) dynastic period and early Middle Kingdom period of ancient Egypt. It is a very
difficult technique that requires the background around images to be fully carved away. This makes the images appear to be rising up out of the stone without noticeable borders made around them to create an illusion of depth. This is very different from the inferior reliefs in the Temple to Hathor, which feature deep incisions around the otherwise shallowly carved images. This makes the images appear to have depth, but in actuality they don’t rise up higher than the flat stone base they are carved into. This can be seen in the illustrations on page 81, which show both styles of relief carving.

**An Illustration of the Dendera Zodiac Ceiling**

Even more compelling as a clue to its advanced age, the Dendera Zodiac depicts the night sky in a much earlier era. Instead of the sky in
400 BC or even 1500 BC, it shows the sky as it would have appeared in 4000 BC! This fact alone suggests a much earlier date for its creation. Interestingly, that was the era when Adam was created. The Dendera Zodiac may therefore depict the primeval night sky as initially viewed by Adam, the first human being.

Though Enoch is the most likely candidate to have carved the Dendera Zodiac, there are a few others who could have manufactured this Zodiac. One candidate is mentioned in the Book of Jasher, where Job is identified as an advisor to the Pharaoh of the Exodus. Another is found in Josephus’ histories, where we are told that Abraham taught the Egyptians the science of Astronomy.

Center Detail of the Dendera Zodiac
As I explored this vein of thought, it dawned on me that the patriarch Joseph also could have ordered the carving of the circular Dendera Zodiac while he served as the Vizier of all Egypt. After all, in one of his prophetic dreams, Jacob’s son Joseph saw the Sun, Moon and eleven stars as his father, mother and brothers, and they were bowing down to his star. This dream strongly suggests that Joseph and his family were already familiar with their allegorical connection to the stars in the heavens (Genesis 37:6-11).

These facts briefly made me wonder: “Could Abraham be the source of the Dendera Zodiac? Or could Job or Joseph have commissioned its manufacture while they served as advisors to the Pharaoh?” Though these questions intrigued me for a while when I contemplated the feasibility of the hypothesis that the Israelites could have built the Great Pyramid under Joseph’s direction, the weathering and carving style of the Dendera Zodiac strongly suggest that it had a Pre-Flood origin, which firmly rules out Abraham, Job and Joseph as its creators. Yet, no matter who carved the Dendera Zodiac, the great depth of meaning that is so expertly displayed in it, and the precise way it was carved and polished suggest that someone spent a great deal of time planning and executing it for posterity for an extremely important reason.

As shown in the illustrations on pages 82 and 83, the Dendera Zodiac is a carved circular Zodiac showing allegorical images associated with the 48 constellations of the ancient Zodiac. These are encircled by a procession of figures depicting the 36 decan signs of the Zodiac. In Book One, each one of these symbols is meticulously analyzed. Archeologists speculate that the Zodiac was depicted this way to show that the ancient Egyptians used a 10-day sacred week to keep their years, and each 10-day week was marked by one of the 36 decan signs of the Zodiac, of which there are 3 assigned to each of the twelve Zodiac signs. To keep their year in sync with the Solar Year, the Egyptians then supposedly added five days at the end of every 360-day year cycle.

In the course of my research, it became apparent to me that this traditional interpretation of the Egyptian calendar may be incorrect. In fact, it seems far more likely that the Egyptians initially measured their year in 36 ten-degree increments that followed the movement of the decan signs. In other words, as discussed in Book One, the creators of the Dendera Zodiac likely marked out each Solar Year in 360 degree circles of the Zodiac along the Ecliptic rather than by the number of days that had passed.

If they measured each year by the movements of the Zodiac in degrees rather than in the hourly increments reserved for dividing the
day, they wouldn’t need to add any days to the end of the year since a
celestial circle of 360 degrees measures the full length of the Solar Year.
However, perhaps during one of the periods of chaos between ruling
dynastic periods in Egypt, the infrastructure needed to carefully observe
and record the movements of the heavens was lost. If so, the Egyptians
may have switched to a more primitive method of keeping time. In that
regard, simply adding 5 days to a 360-day year doesn’t require
particularly careful astronomical calculations.

Due to the use of the term “Heavenly Tablets” to refer to the
Mazzaroth or Zodiac in the Book of 1 Enoch and the Book of Jubilees, it
is likely that Enoch and his Sethite descendants collectively called the
forty-eight ancient constellations depicted in the Dendera Zodiac by this
name. In 1 Enoch, we are told that these tablets instructed men and
angels - ostensibly through the major star clusters in the night sky. In
the following visionary journey, Enoch is caught up to an other-worldly
place of fiery torment for sinners where he asks one of the holy angels
accompanying him to explain what he is seeing:

“And wait ye indeed till sin has passed away, for their
names shall be blotted out of the book of life and out of the
holy books, and their seed shall be destroyed for ever, and
their spirits shall be slain, and they shall cry and make
lamentation in a place that is a chaotic wilderness, and in the
fire shall they burn; for there is no earth there. And I saw
there something like an invisible cloud; for by reason of its
depth I could not look over, and I saw a flame of fire blazing
brightly, and things like shining mountains circling and
sweeping to and fro.

And I asked one of the holy angels who was with me
and said unto him: ‘What is this shining thing? for it is not a
heaven but only the flame of a blazing fire, and the voice of
weeping and crying and lamentation and strong pain.’ And he
said unto me: ‘This place which thou seest - here are cast the
spirits of sinners and blasphemers, and of those who work
wickedness, and of those who pervert everything that the
Lord hath spoken through the mouth of the prophets - (even)
the things that shall be. For some of them are written and
inscribed above in the heaven, in order that the angels may
read them and know that which shall befall the sinners, and
the spirits of the humble, and of those who have afflicted their
bodies, and been recompensed.’” - 1 Enoch 108:3-7

As the angel and Enoch view this hellish place that appears to be
separate from the Earth, the angel proceeds to tell Enoch that some of
the past, present and future deeds of both good and evil people are written or recorded in the heavens by some mysterious method. Furthermore, the angel also testifies that he and his fellow angels have been instructed on how to read these records.

Now, since Yahweh is actively involved in righteous people’s affairs, it follows that the Will of God is also recorded in these same heavens and that both good and fallen angels could perceive God’s Will there. Unfortunately, since the fallen angels had access to these same records, they eventually attempted to alter the future and tamper with God’s recorded will for humanity. Thankfully, however, the angels were not privy to all of God’s secrets, but only the Holy Spirit, who knows the hearts of men and angels and can withhold vital information from them whenever necessary. Otherwise, if Satan and his minions had known how efficacious Yahshua’s death and resurrection would be for humanity, Yahshua would never have been crucified! Nonetheless, as shown in Chapter Three, the nature and location of Yahshua’s crucifixion and the merciful result of His sacrificial death for mankind are clearly revealed in the heavens and can be perceived by those whom the Holy Spirit has chosen to reveal them to. Here is an astronomer’s glimpse of the starry heavens surrounding the Zodiac signs of Gemini and Taurus - where the record of Yahshua’s crucifixion and the purpose of His death was recorded by Yahweh for all time:
That the heavens serve as a divine record of mankind’s deeds and God’s Will over time makes sense spiritually. This is because the Sun signifies God’s power, and the stars allegorically represent God’s holy angels (1 Enoch 86:1-4) as well as the natural and spiritual offspring of Abraham (Genesis 15:5; Deut. 1:10, 10:22). The natural descendants of Abraham include the people descended from Ishmael’s twelve sons, the Twelve Tribes of Israel, and the children Abraham fathered with his second wife Keturah, whom Abraham married after Sarah died. In addition, the redeemed are adopted into both Abraham’s and Yahweh’s Family through the rites of Blood Covenating, Adoption, and Marriage (See Book Two for more on these important subjects). In this way, all those who love Yahshua are seen as His intimate blood relations, and can share in all of God’s promises to Abraham, Israel and Joseph.

In the Book of 1 Enoch, Enoch deems it important enough to remind his audience several times that he was given the ability to read these Heavenly Tablets, and that - once he understood them - he realized that they tell a story like books:

“And he said unto me: ‘Observe, Enoch, these heavenly tablets, And read what is written thereon, And mark every individual fact.’ And I observed the heavenly tablets, and read everything which was written (thereon) and understood everything, and read the book of all the deeds of mankind, and of all the children of flesh.” - 1 Enoch 81:1-2

“Yea, I Enoch will declare (them) unto you, my sons: According to that which appeared to me in the heavenly vision, and which I have known through the word of the holy angels, and have learnt from the heavenly tablets.” - 1 Enoch 93:1-2

“I know a mystery and have read the heavenly tablets, and have seen the holy books...” - 1 Enoch 103:1

“And after that there shall be still more unrighteousness than that which was first consummated on the Earth; for I know the mysteries of the holy ones; for He, the Lord, has showed me and informed me, and I have read (them) in the heavenly tablets.” “And I saw written on them that generation upon generation shall transgress, till a generation of righteousness arises, and transgression is destroyed and sin passes away from the Earth...” - 1 Enoch 106:18 thru 107:1

Though we do not ordinarily think in metaphorical terms, Enoch’s generation did. That is why Enoch’s references to reading
Heavenly Tablets that he described as holy books seems strange to us. We find it hard to picture a material artifact such as a written record or book in a spiritual place such as Heaven. But, since it is written in the heavens, this record cannot be an ordinary book, which is composed using a specific language and alphabet. In fact, any mental picture of a heavenly book seems nonsensical until we regard it as using allegorical pictures to convey spiritual truth instead of words.

When the Heavenly Tablets are thought of as an allegorical record, it makes sense to suppose that Enoch was talking about a series of symbols that were somehow transcribed onto the vault of the physical heavens. It also seems reasonable to assume that this record is easily observable both to angels in their heavenly realms, and by people residing on Earth. These assumptions make sense because Enoch clearly indicated that these Heavenly Tablets tell a story “of all the deeds of mankind,” and that they were initially created for the angels by God. They are therefore not just technical explanations of how the heavens are structured, or lists of universal facts. Instead, these Heavenly Tablets tell a story about the deeds of men, and they can be read like a book.

As he read the Heavenly Tablets, Enoch tells us that: “I saw written on them that generation upon generation shall transgress, till a generation of righteousness arises.” This means that Enoch saw the entire future of mankind - from the Creation and Fall of Adam and Eve to the New Heaven and Earth - written in the Heavenly Tablets. As discussed in my book: “The Language of God in the Universe,” it is my contention that the forty-eight constellations of the Ancient Zodiac may represent the Heavenly Tablets that Enoch discovered.

In the next chapter, the review of all forty-eight constellations shows what Enoch and his Sethite kin may have understood concerning the Gospel in the Stars. In fact, it clearly shows that the ancient Zodiac was always meant to be an eternal record of Yahweh’s unchanging Will, mankind’s disastrous choices, and the amazing forgiveness, salvation, Grace and Spirit that Christ offers to all who love Him.

**Enoch’s Four Corners and Eighteen Part Day**

The Book of 1 Enoch has thus far been shown to be a storehouse of knowledge about the triune nature of God, as well as a prophetic powerhouse announcing the coming of the Son of Man or Messiah - just as the Gospel in the Stars found in the Heavenly Tablets does. But it is so much more than that! In fact, because the Sethite Enoch no doubt wrote 1 Enoch, it can serve as a proof text showing that the Sethites
were indeed the inventors of Astronomy, just as the 1st century historian Josephus recorded.

For example, 1 Enoch can help us to understand some terms used often in the Bible that relate to Astronomy, time and direction. These are “the four winds of heaven” or “the four winds,” and “the four corners of the earth” or “the (four) ends of the earth.” Four is the number of Creation - it being the one thing as a whole that was created by the Three Persons of the Trinity working together, and $3 + 1 = 4$. As such, the number four figures prominently in most calendrical systems used for telling time. In the Bible, the number four is used to identify God’s physical creation in time and space. This is shown in these key Scriptures:

“He will set up a banner for the nations, and will assemble the outcasts of Israel, and gather together the dispersed of Judah from the four corners of the earth.” - Isaiah 11:12 (NKJ)

“Then He said to me, ‘Prophesy to the breath, prophesy, son of man, and say to the breath, ‘Thus says the Lord GOD: 'Come from the four winds, O breath, and breathe on these slain, that they may live.’”' - Ezekiel 37:9 (NKJ)

“And He will send His angels with a great sound of a trumpet, and they will gather together His elect from the four winds, from one end of heaven to the other.” - Matthew 24:31 (NKJ)

“I saw four angels standing at the four corners of the earth, holding the four winds of the earth, that the wind should not blow on the earth, on the sea, or on any tree.” - Rev. 7:1 (NKJ)

The four corners or ends of the Earth are mentioned in the Bible to indicate that the whole Earth is being referred to, and that God has control over every part of it. The four corners of the Earth are connected to the directions north, south, east and west, as well as the fixed signs of the Zodiac associated with these directions, which are Scorpio, Taurus, Leo and Aquarius. There are also four Cherubim before God’s Throne that are tied to the four fixed Zodiac signs and represent all of God’s heavenly Creation. These four corners are also tied to the four elements: earth (Taurus), air (Aquarius), water (Scorpio) and fire (Leo); the four seasons (circa 4000 BC): spring (Taurus), summer (Leo), autumn (Scorpio), and winter (Aquarius); the four phases of the moon (full, waxing, waning, and new), the four divisions of the day (dusk,
midnight, dawn, and noon), and the four major phases of the Sun found at the two equinoxes and solstices every year.

The four corners may have had physical locations along the Earth’s equator that were known and utilized as spiritual and geographical markers before the Great Flood. It is also likely that Noah and his sons utilized an already established border found with Sacred Astronomy to divide the world into four quarters after the Flood. We will discuss these ideas further in Chapter Six.

In the following passage, Enoch tells us that the four archangels assigned to these four corners or directions are Michael, Raphael, Gabriel and Phanuel:

“And on the four sides of the Lord of Spirits I saw four presences... and I learnt their names: for the angel that went with me made known to me their names, and showed me all the hidden things. And I heard the voices of those four presences as they uttered praises before the Lord of glory...”

“After that I asked the angel of peace who went with me, who showed me everything that is hidden: 'Who are these four presences which I have seen and whose words I have heard and written down?' And he said to me: This first is Michael, the merciful and long-suffering: and the second, who is set over all the diseases and all the wounds of the children of men, is Raphael: and the third, who is set over all the powers, is Gabriel: and the fourth, who is set over the repentance unto hope of those who inherit eternal life is named Phanuel (NOTE: Phanuel encourages people to repent to gain eternal life, but does not offer salvation. Only Christ can do that).

And these are the four angels of the Lord of Spirits and the four voices I heard in those days.” - 1 Enoch 40:2-3, 8-11

The four angels are on the four sides of the Lord of Spirits, who corresponds in function to the Holy Spirit. The sides around the Lord of Spirits are analogous with the sides of the outer court of the Tabernacle and Temple, which housed the Ark of the Covenant. Now the earthly Tabernacle and Temple served as a literal, but temporary dwelling place of the Holy Spirit through the Ark. The four angels are therefore tied to the sides and the corners formed by the sides of that Ark, as well as the heavenly Ark in the heavenly Temple. These are most likely the four angels in Revelation that control the four corners and four winds (Rev. 7:1). The connection of the four angels with the four sides and corners of the heavenly Tabernacle or Temple can be seen in 1 Enoch 71:5, 8-9, which speaks of the Heavenly Temple as a structure built of crystals:
Chapter Two: The Legacy of Enoch, Pre-Flood Prophet of God

“And he translated my spirit into the heaven of heavens, and I saw there as it were a structure built of crystals, and between those crystals tongues of living fire.”

“And Michael, and Raphael, and Gabriel, and Phanuel, and the holy angels who are above the heavens, go in and out of that house. And they came forth from that house, and Michael and Gabriel, Raphael and Phanuel, and many holy angels without number.” - 1 Enoch 71:5, 8-9

These same four angels going in and out of that heavenly Temple may govern “the four winds” mentioned in the Bible. These winds are intimately connected to Astronomy, because they describe the entire expanse of heaven, which is the realm of the atmosphere, as well as Outer Space. It is also used in Scripture to describe the Spirit of God moving through specific time periods, and specific places in heaven. This is because three dimensions in the physical world - height, depth, and width - are tied to size, place, or location. But when a specific speed, direction of travel, or time period is being alluded to within creation, the fourth dimension called time must be added.

Hence, the four winds are a description of the four dimensions: height, depth, width, and time, with time being intimately connected to velocity. In addition, the four winds are related to the four rivers in the Garden of Eden, which in turn are tied to this idea of four dimensions. This is because rivers, like wind, continually flow through time and space, and only the infinite being called Yahweh can navigate the endless rivers of time, and steer the eternal winds governing motion in space.

Interestingly, four is often used in the Bible to show completeness or wholeness on a spiritual level as well as a physical level. There are, for example, four Hebrew letters in God’s Name, which correspond to YHWH in English. There are also four cups at the Passover Seder, which may correspond to the four corners of the altar used in the Tabernacle and Temple. Interestingly, the Third Cup of the Seder is the Cup of Redemption that Yahshua connected to His saving blood that was shed for us on the Cross. There are also four corners on the ritual garment called the “tallit,” or prayer shawl, which has a blue thread included in the four long strands knotted to each corner of it that represents the Messiah.

As the Messiah, Yahshua certainly wore a prayer shawl or tallit, from which the woman with the issue of blood was healed when she touched the fringes on its edge (Mat. 9:20-22). In addition, the four canonical Gospels can be seen as four symbolic pillars connected to the four corners of the world and the four corner tassels on the tallit.
During the Feast of Tabernacles, or Sukkot, four species of plants are gathered together for the ritual bundle used to decorate festival booths called “sukkahs.” This bundle is made from the branches from four symbolic trees: the citron, the date palm, the myrtle, and the willow. Four poles are also needed to hold up the special wedding canopies known as “chuppahs” used at Jewish weddings, suggesting that a wedding represents the melding of the four corners of the earth and the four winds of heaven into one creation. This is, in all probability, why the Bible speaks of Yahshua marrying His Bride, the True Church. Jews also see four ways of interpreting the Torah. These are by finding the plain meaning, the allegorical meaning, the interpretive meaning, and the mystical meaning. All Bible prophecies and all of Yahshua’s Parables should be interpreted in all four ways in order to not lose any of their allegorical and literal meaning.

In the section called “The Book of the Heavenly Luminaries” in chapters 72 through 76 of the Book of 1 Enoch, Enoch speaks at length about his astronomical observations made with the help of an angel named Uriel, who was a Watcher who never sinned, and therefore still had access to the Third Heaven beyond our Universe where God dwells. To see what truths 1 Enoch reveals about Enoch’s Pre-Flood calendar, we must systematically examine these four chapters in which Uriel unselfishly shares much special celestial and spiritual knowledge with Enoch.

Let’s start with Chapter 72 of the Book of 1 Enoch, where a mysterious 18-part day is used to mark the varying length of the ratio between day and night. Some scholars have speculated that this means Enoch’s day was only 18 hours long compared to our 24-hour day, and they assume that there was some cataclysmic change since Enoch’s day that caused our day to be longer than his.

However, since Enoch lived in a far different Age than our own, it makes no sense to suppose that the divisions of the day Enoch used were even remotely similar to ours! There is, rather, a far better explanation for this 18-part day that fits right in with the Sacred Astronomy Enoch knew. Since Enoch likely viewed the circle of a year as a division of twelve Zodiac signs with three decan subdivisions each, he probably also viewed the length of a day on a circle with divisions based on the numbers 12, and 36 (3 X 12 = 36). If so, each part of Enoch’s 18-part day would consist of the space allotted to 2 decans on the Zodiac circle, and would form the basis for dividing up the sections of the circular Enochian Time Clock.

To imagine Enoch’s clock, picture a Zodiac diagram with 12 main divisions in the topmost circle depicting 12 Solar months, and below it
an inner circle of 36 divisions each measuring 10 degrees of the 360
degree Zodiac circle. Now, below the inner circle, envision a still smaller
circle of 18 divisions reflecting an Enochian hour, with each space
covering 20 degrees of a circle. Fascinatingly, when added up, the three
parts of this clock - 12, 36, and 18 - equal 66, which is the number of
books in the Protestant Bible!

The illustration on page 94 shows what this Enochian Clock may
have looked like if conceptualized in a circle with the 36 decan divisions
of 10 degrees each as time markers around its circumference. If
envisioned this way, Enoch’s clock could have had 18 “hour” markers,
and 36 “half-hour” markers. In addition, each set of three decans under
each Zodiac sign totals 30 degrees - with each degree closely reflecting
the day of the month.

If this Enochian Clock were mechanized, the beginning of the
nighttime portion of the 18-part day shown in the inner circle would be
marked with a clock hand ending with a Moon symbol pointer, while a
Sunburst symbol pointer would mark dawn or the beginning of the
daylight hours. Meanwhile, the Zodiac and Decan divisions would turn
to align with their real position at any of those 18 given times of day.
Finally, a clock hand with an arrow tip would point to the part or hour
of the day. By the location of the Sun and Moon symbol hands in
relation to the Zodiac decans, a person viewing the clock would know
exactly what month and day it was, how many daylight hours were in
each day, and - per the arrow symbol clock hand - the hour of the day.

Now, in his book, Enoch said that he could read all the deeds of
men and angels in the “Heavenly Tablets,” which is most likely a
reference to the Zodiac. Since Enoch could read “all the deeds of
mankind” at any moment in time, the idea that the Zodiac depicts the
entire scope of human history all at once makes sense. Since the Jews
believed that six thousand years would pass during which mankind
would be judged, and there are 36 times 10 on the Zodiacal Wheel, we
can divide 6000 years by 36, which equals the repeating decimal
166.666..., and assigns approximately 166.5 years of human history to
every ten degrees on the Zodiacal Wheel.

However, understanding time through a series of infinitely
repeating decimals is awkward at best, and highly confusing. In
addition, Enoch wrote a prophecy filled with allegorical imagery that
covers the entire span of human history as occurring in 10 times 700
years, or 7000 years (1 Enoch 89:1 through 91:17). This fascinating,
parable-style prophecy is fully interpreted in my book “The Language of
God in Prophecy” as it pertains to the End Times. Because this prophecy
spans 7000 years, Enoch was including the Millennial Rule of Christ with
the six-thousand years allotted to mankind, which covers the period from the creation of Adam in 4003 BC to the end of the Sixth Great (1000-year) Day in 1999 AD.

</table>

The table above reflects each month of the 364-day Pre-Flood year exactly as given in 1 Enoch, Chapter 72. Enoch divided one day from dusk to dusk into eighteen parts or “hours,” and then indicated how many parts occurred in daylight and how many in darkness as the year progressed. The Four Quarters or Seasons were determined by the Equinoxes and Solstices, with the Spring Equinox ending the year and marking the beginning of the first month of the New Year. Each month was 30 days with an extra day at each Equinox and Solstice, giving the last month per Quarter 31 days. On the Enochian Clock, the Sun and Moon hands would not advance for 2 full days in order to “count” the 30th & 31st day. Each part or “hour” covered 2 decans of 10 degrees or 20 degrees (i.e. “minutes”) on the Zodiacal Wheel.
Currently, even though we are in the millennial period when Yahshua’s Kingdom should have already been established, it has been delayed so that there would be no question about God’s ability to show mercy and compassion above and beyond the allotted time He gave for mankind to repent. See Book Four for a deeper explanation of why Yahshua’s Millennial Rule didn’t begin in 1999 or 2000 AD, and what humanity can expect when they enter the seven-year Tribulation period - or the time when mankind’s works will be judged, and when the imperfection and sinfulness of their works outside of God’s leadership will be fully exposed.

Zodiacal Wheel Depicting 10 Times 700 Years
